District of Columbia
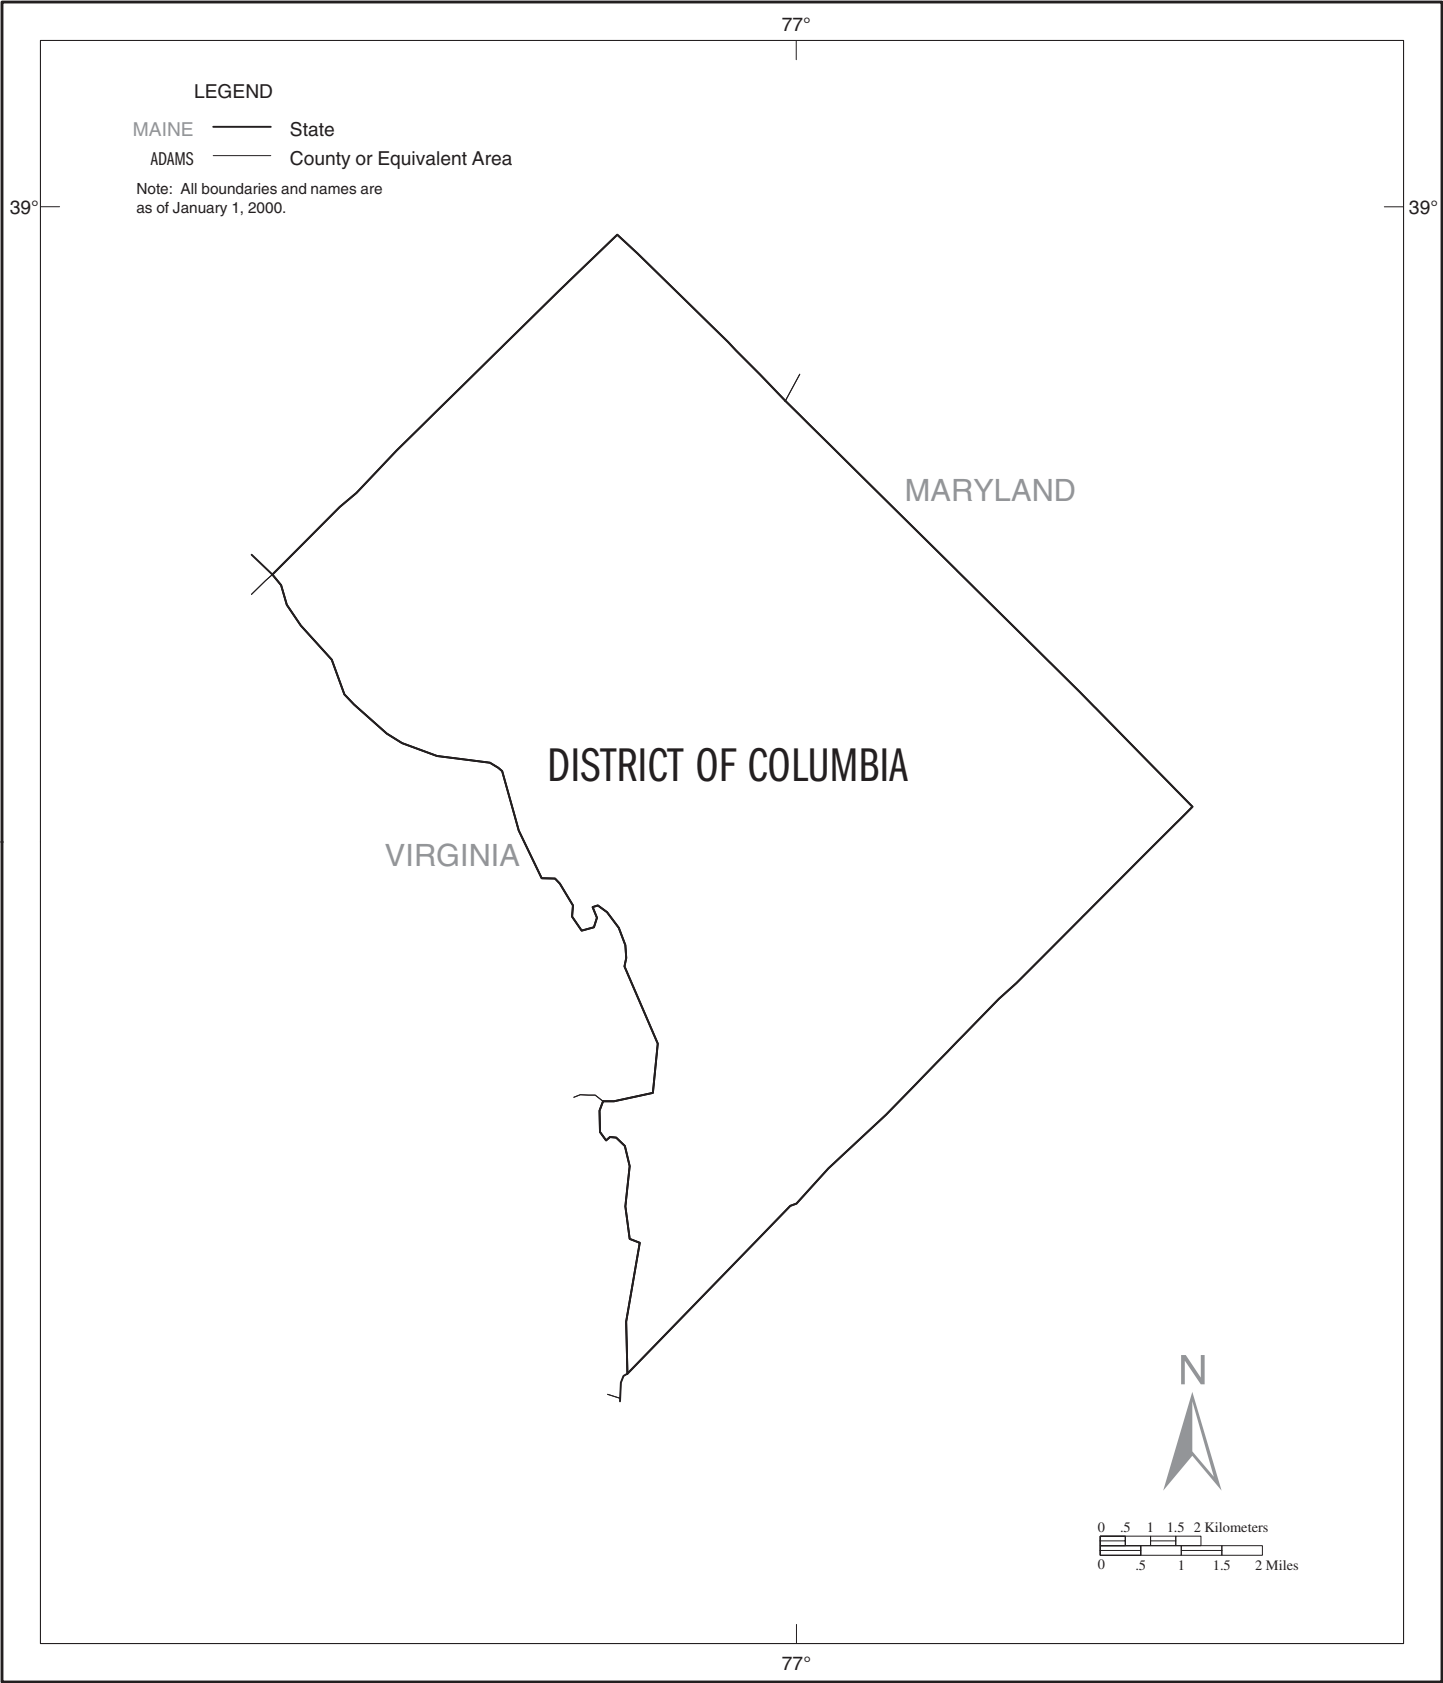

District of Columbia Outline Map Legend

Map Legend

— · — · — · —	State or Statistically Equivalent Entity
ERIE	County or Statistically Equivalent Entity
– – – – – – – – ROME	Incorporated Place[1]
————— *Lake Erie*	Large River, Lake, Water Body, or Shoreline
⌐——→	A fishhook joins contiguous and/or discontiguous parts of the same geographic entity

[1] The District of Columbia is statistically equivalent to a state and also treated as statistically equivalent to a county. Washington city is not divided into any subdivisions and thus serves as the statistical equivalent of a legal county subdivision. The boundaries and name for the county subdivision are the same as the city and not shown on the map.

Note: All legal boundaries and names are as of January 1, 2000. Where state, county, and/or county subdivision boundaries coincide, the map shows the boundary symbol for the highest level of these geographic entities. The county boundary is always shown. Where a county subdivision boundary coincides with a place boundary, the map does not show the place boundary symbol. Any geographic entity name may include '(pt.)' if some portion of the entity extends beyond the limits of the map area displayed on the page, or if multiple discontiguous pieces of the entity have been discretely labeled on the page. A geographic entity name may include '(pts.)' if many discontiguous pieces exist for that entity that cannot be discretely labeled. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
